

Advancing Kidney Health through Optimal Medication Management **Learning Action Collaborative**

Our Vision

Every person with kidney disease receives optimal medication management through team-based care including a pharmacist to ensure their medications are safe, effective, affordable and can be taken as intended.

LAC Goals

Advance the inclusion of pharmacists on interdisciplinary care teams **to bridge the gap** between Nephrology, Cardiology, Endocrinology and Primary care for patients with Cardiovascular-Kidney-Metabolic (CKM) syndrome by implementing CMM services.

Help meet new value-based payment model metrics and serve as evidence-generating incubators for interdisciplinary CKM care.

Foster learning and action to ensure best practices in the care of patients with chronic kidney disease and CKM.

Tools & Resources

Comprehensive Medication Management (CMM)

- Defining a Philosophy of Practice
- Delivering the CMM Patient Care Process
- Establishing a robust Practice Management

Implementation Science

- Supporting your team with dedicated learning coach
- Pacing implementation with proven quality improvement strategies.
- Using Plan-Do-Study-Act (PDSA) cycles.

Progress Tracking

- Defining a Measurement Strategy
- Tracking outcome and process measures with customizable templates.
- Developing your organization's Performance Story.

Learning Collaborative

- Offering live and virtual pacing events
- Connecting teams with nephrology field experts
- Celebrating team accomplishments

Each team is guided by an Implementation Coach.

Successful Implementation Team:

3-4 Members
Pharmacist required

Other members:
physician, nurse,
administrative and/or
IT staff

Team Expectations:

Up to 8 hours a
month for entire
team

Pharmacist
completes CMM
training

Administrative
support &
champion(s) are
identified

Coach

Expert in
implementation
science

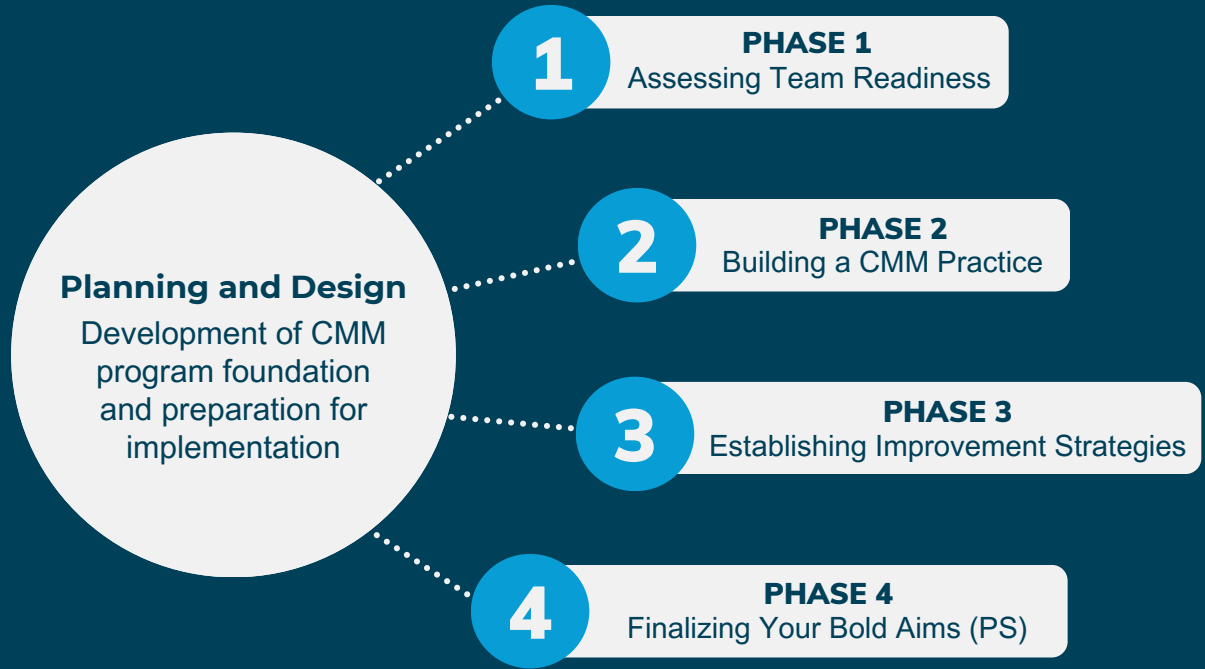

Field Experts

in Nephrology
